JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 346 Nos. 1 and 2 10 MARCH 1993

CONTENTS

The Crank–Nicolson technique—an efficient algorithm for the simulation of electrode processes at macro- and microelectrodes
M. Störzbach and J. Heinze (Freiburg, Germany) 1

The application of the concept of the steady-state reaction–diffusion layer to a study of the electrode processes with multistep reactions at microelectrodes under steady-state conditions
Q. Zhuang and H. Chen (Nanjing, People's Republic of China) 29

Chronopotentiometry with several types of programmed current at most usual electrodes: general study of systems with coupled first-order chemical reactions
A. Molina, M. López-Tenés and C. Serna (Espinardo, Spain) 53

A model for the effect of roughness of single-crystal electrodes on Parsons–Zobel plots
M.L. Foresti, R. Guidelli (Firenze, Italy) and A. Hamelin (Meudon, France) 73

Growth of polyaniline films under pulse potentiostatic conditions
V. Tsakova, A. Milchev (Sofia, Bulgaria) and J.W. Schultze (Düsseldorf, Germany) 85

Correlation of excess power and helium production during D_2O and H_2O electrolysis using palladium cathodes
M.H. Miles, R.A. Hollins (China Lake, CA, USA), B.F. Bush, J.J. Lagowski (Austin, TX, USA) and R.E. Miles (Golden, CO, USA) 99

The mirage effect: a sensitive probe for electrochemical cell calorimetry
J.M. Rosolen, M. Fracastoro-Decker and F. Decker (Campinas, Brazil) 119

The application of mercury hemispherical ultramicroelectrodes to the study of very concentrated amalgams. Diffusion coefficients of thallium
P. Krasiński and Z. Galus (Warsaw, Poland) 135

Topographical imaging of Prussian Blue surfaces by direct-mode scanning electrochemical microscopy
H. Sugimura, N. Shimo, N. Kitamura, H. Masuhara (Chiba, Japan) and K. Itaya (Sendai, Japan) 147

Bioelectrocatalysis at organic conducting salt electrodes. Use of hexamethylenetetratellurafulvalene tetracyanoquinodimethane (HMTTeF–TCNQ) as a versatile electrode material
S. Zhao and R.B. Lennox (Montreal, Canada) 161

Polarographic study of the O-chain lipopolysaccharide of *Brucella melitensis* after labelling as the *N*-maleylamide derivative
A.S. Pérez, J.J.F. Rábano and J.E.F. De Frutos (Salamanca, Spain) 175

Characterization of a Pt + Pd alloy electrode by underpotential deposition of copper
F. Fiçicioğlu and F. Kadirgan (Maslak-İstanbul, Turkey) 187

Ac voltammetric measurements of fast charge-transfer processes at ultramicroelectrodes
K. Winkler and A. Baranski (Saskatoon, Canada) 197

Transport to rough electrode surfaces. Part 2: Perturbation solution for two-dimensional steady state transport to an arbitrary surface under mixed diffusion–kinetic control
D.S. Louch and M.D. Pritzker (Waterloo, Canada) 211

Study on mass transport in Eastman-AQ polymer film by using non-steady-state chronoamperometry at an ultramicrodisk electrode
G. Che and S. Dong (Changchun, China) 239

Test of the Gouy–Chapman theory at a (111) silver single-crystal electrode
A. Hamelin (Meudon, France), M.L. Foresti and R. Guidelli (Firenze, Italy) 251

Spectroelectrochemistry of the hexanuclear cluster $[Ru_3O(acetate)_6\text{-}\mu\text{-}(pyrazine)_3\text{-}\{Fe(CN)_5\}_3]^{n-}$ and of its modified nickel electrode in aqueous solution
H.E. Toma, F.M. Matsumoto and C. Cipriano (São Paulo, Brazil) 261

Solvent effects on the two-dimensional condensation of 2-thiouracil
T. Wandlowski (Washington, DC, USA), P. Chaiyasith and H. Baumgärtl (Berlin, Germany) . 271

Resonance Raman measurement of electrochemically generated short-lived intermediates by means of a pulse electrolysis stopped flow method
M. Oyama (Nagoya, Japan), M. Okada (Kyoto, Japan) and S. Okazaki (Matsuyama, Japan) . . 281

Preparation of TiO_2 (anatase) films on electrodes by anodic oxidative hydrolysis of $TiCl_3$
L. Kavan, B. O'Regan, A. Kay and M. Grätzel (Lausanne, Switzerland) 291

Electro-oxidation of L-ascorbic acid on platinum in acid solutions: an in-situ FTIRRAS study
X. Xing, I. Tae Bae, M. Shao and C.-C. Liu (Cleveland, OH, USA) 309

Electroreduction of nitrobenzene on the mercury electrode in water + HMPA solutions
A. Kalandyk and J. Stroka (Warsaw, Poland) 323

Anodic oxidation of antimony at high overpotentials — formation of a barrier layer and klebelsbergite
M. Bojinov and D. Pavlov (Sofia, Bulgaria) 339

Electrochemical reduction of 2,6-diphenylpyrylium cations by spin-polarized electrons on p-GaAs photocathodes
A.D. Modestov and V.E. Kazarinov (Moscow, Russian Federation) 353

Anodic oxidation of different substituted mono-, bis- and trishydrazines
G.M. Abou-Elenien (Giza, Egypt) 367

Electrochemical and enzymatic oxidation of 5-hydroxytryptophan
K.A. Humphries, M.Z. Wrona and G. Dryhurst (Norman, OK, USA) 377

Effect of Tl, Cd and Cu adatoms deposited at underpotentials onto Pd: oxidation of hydrazine
G. Ritzoulis and N. Georgolios (Thessaloniki, Greece) 405

Integrated electromodulated IR reflectance spectroscopy bands. Part 2: Methanol adsorbates at polycrystalline platinum and Pt(111) single-crystal electrodes in acid medium
M.I. Lopes, I. Fonseca (Lisboa, Portugal), P. Olivi, B. Beden, F. Hahn, J.M. Léger and C. Lamy (Poitiers, France) 415

Kinetic Ising model in electrochemistry: its general scope and particular applications in adsorption kinetics
E. Bosco (Karaikudi, India) 433

Voltammetric study of the electroadsorption and electrooxidation of CO on Pt in 0.5 M $HClO_4$: influence of several experimental variables
J.A. Caram and C. Gutiérrez (Madrid, Spain) 451

Short communications

Application of the concept of the reaction layer to the study of multistep-electrode processes at microelectrodes
Q. Zhuang and H. Chen (Nanjing, China) 471

Origin of the difference between potentiostatic and cyclic potential sweep depositions of polyaniline
C.Q. Cui, L.H. Ong, T.C. Tan and J.Y. Lee (Singapore, Singapore) 477

Adsorption parameters within the unstable region of thymine on the Hg electrode and the problem of the size ratio parameter
P. Nikitas and A. Pappa-Louisi (Thessaloniki, Greece) 483

Preliminary note

Adsorbed HNO_2/NO redox couple at Pt(111) single-crystal electrode
S. Ye and H. Kita (Sapporo, Japan) 489
